

Feature engineering in forecasting

Challenges

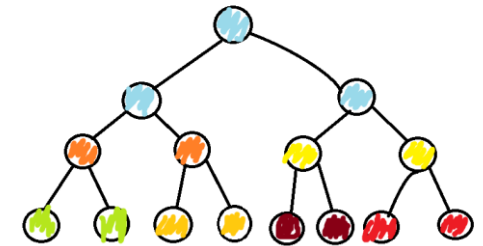

Machine learning workflow

Challenges

1. How am I going to make forecasts in new data?
2. How am I going to send data to the deployed model?
3. How do I make multistep forecasting?

Machine learning model
(training)

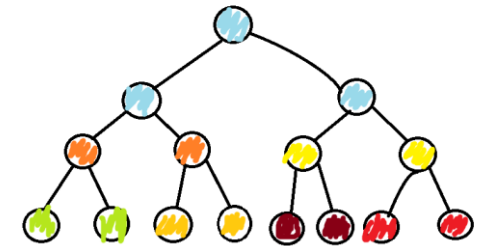

(evaluation)

Opportunities

1. What can I bring forward from supervised learning strategies?
2. How is forecasting different from supervised learning strategies?

Machine learning model
(training)

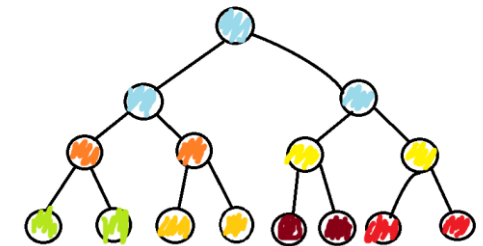

(evaluation)

Summary

1. Machine learning workflow
2. Supervised learning workflow
3. Workflow in forecasting
4. Multistep forecasting
5. Why should I care?

Machine learning model
